

ENHANCED ACADEMIC SPACES

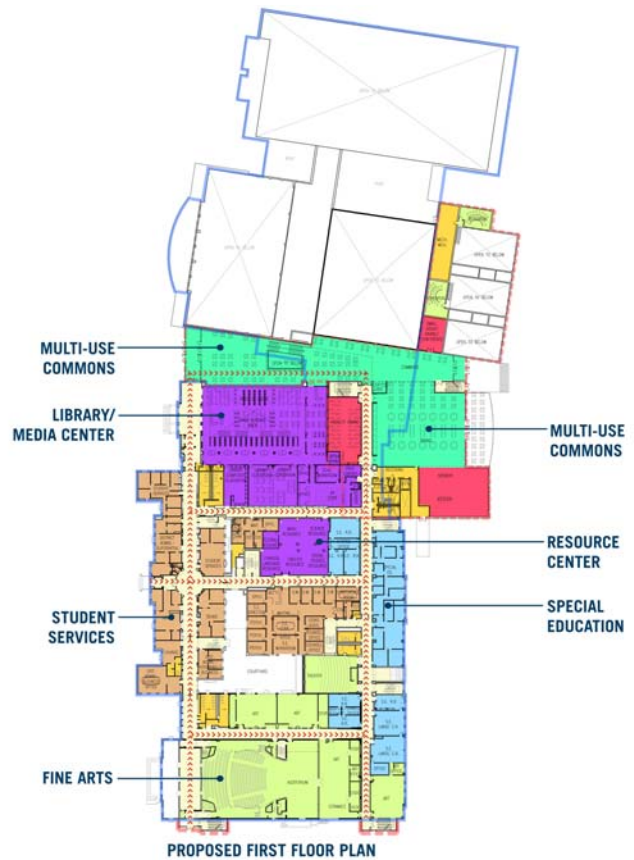

- Improves clustering of classrooms partnered for interdisciplinary learning, on the first floor, five special education resource rooms are being added and consolidated on the first floor paired with expanded student services offices consistent with our student's needs. In addition, an art room has been added.
- A larger, technologically current library/media center will give all students access to research information, as well as reading, library classrooms, and study spaces not presently available.
- A dedicated computer lab is planned on each academic floor as well as providing wireless capabilities to enhance student access to technology.
- A larger, more flexible combination cafeteria and student commons will provide a multi-use area for lunch, study, activities, and meetings.
- A teacher/student resource area is to be established across from the library/media center, where students on lunch or study periods can get immediate help from teachers in each of the five core subject areas.

IMPROVES SAFETY AND SECURITY

- Addresses emergency response (Police and Fire), safety and security, and life safety issues, improving hallway traffic flow, sight lines and handicapped accessibility

EXTENDED COMMUNITY USE

- Library/media center will be available to community after hours

PROPOSED FIRST FLOOR PLAN
