

ENHANCED ACADEMIC SPACES

- Improves clustering of classrooms partnered for interdisciplinary learning, on the second floor, four additional science labs will enable an expanded experimental science curriculum for all levels. They are paired with four additional math classrooms. On the third floor, four additional English and social studies classrooms are clustered.
- Science and math teacher planning areas will be adjacent to enable improved teacher collaboration. English and social studies will be paired on the third floor.
- Small group conference rooms provide spaces for individual learning, conferencing and collaboration.
- A media production center is located for ease of student use and enables access to the latest technology integrated with the library/media center.
- A dedicated computer lab is planned on each academic floor as well as providing wireless capabilities to enhance student access to technology.

IMPROVES SAFETY AND SECURITY

- Addresses emergency response (Police and Fire), safety and security, and life safety issues, improving hallway traffic flow, sight lines and handicapped accessibility

EXTENDED COMMUNITY USE

- Library/media center will be available to community after hours
